Safety precautions

Congratulations for purchasing your new digital photo frame. With this Digital Photo Frame, you can easily and quickly view photos directly from your digital camera's memory card. You can even create a slide show with multiple transition effects. The Digital Photo Frame is compatible with the following memory cards and device: SD, MMC and USB device.

Warning

- High voltage inside. Do not open the casing of the digital photo frame. Refer servicing to qualified personnel only.
- To reduce the risk of fire or electric shock, do not expose this product to rain or moisture.
- To avoid permanent loss of data, do not insert or remove memory cards or USB device when the power is on.

Safety instruction

- The product shall not be exposed to dripping or splashing liquids and no objects filled with liquids, such as vases, shall be placed on the product. Dry location use only.
- No naked flames sources, such as candles, should be placed on or near the product.
- Keep the digital photo frame clean and never store it next to a heat source or in dirty, humid or wet places. Keep it out of direct sunlight.
- Press the buttons gently. Pressing them or the screen too hard can damage the digital photo frame.
- Do not use the product in an extremely dry environment as this can lead to static discharge, which can damage the digital photo frame.
- Do not subject the product to harsh impacts. Do not drop the appliance. These may result in damage to the product and loss of data.
- Do not attempt to repair or disassemble the unit by yourself. Only qualified service personnel should perform repairs.
- The digital photo frame is for indoor use only.
- Only use the DC 5V power adaptor supplied with this product. Do not unplug the adaptor when viewing the pictures.
- Do not block the ventilation holes on the back of the digital photo frame.
- Children should be supervised to ensure that they do not play with the appliance.
- Please unplug the product when you do not intend to use it for a long period of time to prevent overheating and damage to the screen.
- Please insert the plug into the DC IN jack completely on the unit before connecting the AC adaptor to mains supply.
- This product can only play files with compatible format.
- Do not use the product in extreme temperature, the best operating temperature is 5°C-35°C.
- Do not allow metallic objects to touch the DC plug when the player is on.

Cleaning and care

- Always turn off the unit and remove the power adaptor from the mains outlet before cleaning the unit.
- Use a soft dry cloth to clean this product.
- Never spray or pour liquids directly onto the screen or casing.
- Do not use abrasive materials or chemical cleaners such as alcohol, benzene, etc. Do not allow any water or other liquid to enter the appliance.
- Do not drop the unit, which is a complicated electronic device and cannot withstand shock from falls.
- Do not hit or scratch the screen. Handle it with care. The LCD panel of the digital photo frame is made of glass and therefore is sensitive to excessive force or contact with sharp edges.

Keys definitions

1. Right key: Press it to navigate RIGHT when selecting options.
2. Power key: Press it to power on the unit or power off the unit.
3. Up key: Press it to navigate UP when selecting options.
4. Play/Pause key: Press it to confirm option. In slideshow mode, press it to pause or play slideshow.
5. Left key: Press it to navigate LEFT when selecting options.
6. Down key: Press it to navigate DOWN when selecting options.
7. Menu key: Press it to return to the upper menu.
8. Stand hole to hold the digital photo frame.
9. Card reader slot for connecting SD/MMC cards.
10. USB port for connecting most of the USB device directly once all photos are loaded into the USB device.
11. DC 5V IN jack for connecting the supplied AC adaptor to power the digital photo frame.

Note: Due to production improvements, the appliance may differ slightly from the diagram shown. Diagrams in this instruction manual are for reference only.

Preparations

Getting started:

Step 1: Install the stand at the rear of the digital photo frame.

Step 2: Insert memory devices into the correct slot.

Step 3: Insert the DC plug of adaptor to the unit and plug the power adaptor into an available AC 100-240V wall outlet to power on the unit.

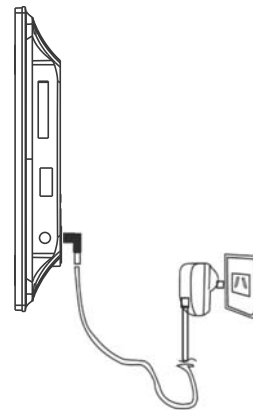

Installing the stand

Install the stand to the stand hole; place it on a stable and flat surface so that it stands up.

Connecting the power supply

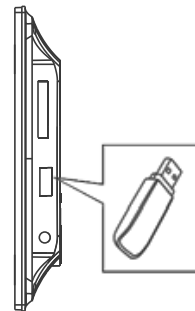

1. Place the digital photo frame on a stable and flat surface.
2. Insert the DC plug of the adaptor into the DC 5V IN on the side of the digital photo frame, and then connect power adaptor to an available AC 100V-240V 50/60Hz mains outlet, the unit will then automatically power on.
3. Press the [⏻] button to power ON/OFF.
4. When the unit is not being used for a long time, press the [⏻] button to power it off again and unplug the AC adaptor from mains outlet.

Connecting a USB device

You can view the pictures from the USB memory device by connecting it to the digital photo frame.

Note: Not all USB storage devices can be read in this digital photo frame.

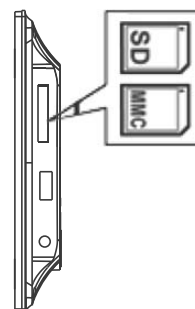

Inserting memory cards

To view the pictures from a compatible memory card, insert it into the respective card slot in the Digital Photo Frame.

This Digital Photo Frame is compatible with the following memory cards: • SD • MMC

Insert a SD or MMC card into the 2-in-1 card slot correctly according to the indication on the unit.

Notes:

1. This unit can play only pictures in USB device or memory card.
2. If your USB device or memory card is loaded with images but do not display, the format of your USB device or memory card might not be compatible with the unit.
3. Do not force the memory card into the slot. If you are not able to insert the memory card easily and completely, you may have inserted it incorrectly.
4. To remove the card, pull out the card slowly. Please DO NOT remove the memory card just after inserting it into the unit or when the unit is processing the files. Wait until the screen is stable.
5. SD Card maximum support is 32GB (FAT32 format), USB maximum support is 8GB(FAT32 format).
6. This unit may not be compatible with all USB devices and memory cards, this is not an indication of a problem with the unit.

Selecting the memory device

Plug in memory device and then press the [⏻] button to power on the Digital Photo Frame, it will enter slide show automatically. Press MENU key to exit slideshow mode and enter the thumbnail mode, press MENU key twice to enter into memory device selecting interface. Press ◀▶ key to select the desired device.
